Year: Nursery

Term: Autumn

<u>Motor Skills</u> Practise getting dressed and putting on your coat, gloves and hat if you have them. Can you do the zip and buttons all on your own?	<u>Mathematical Development</u> Go for a walk and look for numbers. There are numbers everywhere- what numbers can you find? Take a photo of some of the numbers and try to copy them onto a piece of paper.	<u>Family picture.</u> Draw a picture of your family. Can you label your picture with all the names of your family members (ask an adult to help you). Bring in your picture to share with the class.	<u>Reading</u> Ask an adult to read a story to you. Then choose your favourite page and talk about it. What's happening in the picture and why do you like it?
<u>Body percussion.</u> Use your body to make different sounds e.g. clap your hands, stamp your feet, make sounds with your mouth. All of this is body percussion. Create your own 'song' and perform it to the class.	<u>Make a tasty treat!</u> With the help of a grown up choose a recipe and make something delicious. Make sure you help weigh, mix and most importantly taste your creation! Send in a photo of what you have made.	<u>Writing</u> Get outside and mark make! This could be with large paintbrushes in water on the patio or sweeping leaves in the garden, anything really to make those large gross motor movements!	<u>Junk modelling.</u> Use some clean recycling e.g. cereal boxes, bottles or bottle lids to make a model. What will you make, a house, a vehicle or a robot for example? Send in a picture of it to show the class.
<u>Understanding the world.</u> Go for a walk outside and look for signs of Autumn. What can you see, smell, hear, etc? What colour are the leaves, how are they changing.	<u>Physical Development</u> Create your own mini PE circuit at home. Include a jumping zone, jogging zone and stretching zone. Incorporate some of the exercises we use at school like hopping, star jumps and skipping. You could practise throwing and catching with a partner too!	<u>What's the weather?</u> Go outside and look at the weather. With the help of an adult keep a weather diary by drawing a picture of the weather each day for a week on a piece of paper. Bring in your weather diary picture to share with the class.	<u>Self-portrait.</u> Look at your face in a mirror then draw your face on a piece of paper. Remember to add eyes, a nose, mouth and ears, all the little details that make you unique! Bring your picture into class.

One task to be selected each week and shared with your teacher by a photo to class dojo or printed and brought in.
